

CAR NEGATIVE ION PURIFIER

Applicable scenarios:
Car air outlet

Product features

01 Negative oxygen ion purification
The negative ion concentration can release 250,000ions/cm³

02 Small and convenient
It does not occupy space in the car.

03 Silent operation
Concentrate on driving without being disturbed and travel safely.

04 No filter consumables
Energy saving and environmental protection, more convenient to use.

Product functions

- By releasing a large number of negative ions, pollutants in the air are condensed and settled, effectively purifying the air in the car.
- It can quickly remove various pollutants in the car, such as fine particles such as dust, pollen, and PM2.5, as well as harmful gases such as formaldehyde and benzene.
- Negative ions can not only purify the air but also have the effects of regulating the human nervous system, relieving stress, and enhancing immunity.

Using a negative ion purifier in the car can improve the air quality in the car and make you more relaxed and comfortable during driving.

Product parameter

Model	FLZ-MA-03
Size	φ80×47mm
Power	1W
Rated voltage	DC 5V
Weight	70g

Usage method

1. Insert the device into the grille of the vehicle's air conditioning outlet.
2. Connect it to the vehicle power supply through the power cord.
3. Connect the Type-C power cord to the device's power socket. Once connected to the power supply, it can operate.
