

# AIR PURIFIER FOR AUTOMOBILE

Applicable scenarios:  
Car

Three colors  
are available

## Product features

- 01

**Electrostatic integration module**  
Integrating formaldehyde removal module and ozone removal module.  
Professional-level high-efficiency purification.
- 02

**Detect air quality in real time**  
Built-in particulate matter sensor for easy control of indoor air quality changes.
- 03

**Three levels of air volume adjustment**  
According to the real-time reading of the sensor, automatically adjust the air volume.
- 04

**No filter consumables**  
Energy saving and environmental protection, more convenient to use.
- 05

**The operation is simple and convenient**  
Just press it lightly to turn it on. It starts and stops with the vehicle, ensuring a carefree journey.

## Product functions

- It can effectively remove various pollutants in the car, such as dust, pollen, bacteria, viruses, fine particles such as PM2.5, and harmful gases such as formaldehyde and benzene, providing a clean air environment for people in the car, especially those who are allergic and those with sensitive respiratory tracts.
- It quickly eliminates odors in the car, such as cigarette smoke and food smells, bringing a pleasant feeling to drivers and passengers.

## Product parameter

Model	KJ20F-C01
Efficiency (PM2.5)	≥95%
Size	246.5×156.5×83.7mm
Power	13W
Rated voltage	DC 12V
Weight	800g
