

# OXYGEN SOURCE NEGATIVE ION PURIFIER

Style I

Style II

**Applicable scenarios:**  
Study, Bedroom, Living room, etc.

## Product features

- 01 Purification by negative oxygen ions.**  
Remove harmful substances in the air, such as dust, allergens, bacteria, etc.
- 02 Detect air quality in real time**  
Built-in particulate matter sensor for easy control of changes in indoor air quality.
- 03 Silent operation**  
Low-noise operation improves sleep quality.
- 04 No filter consumables**  
Energy saving and environmental protection, more convenient to use.

## Product functions

- Negative ions have a certain sterilization and disinfection effect. They can destroy the cell membrane structure of microorganisms such as bacteria and viruses, making them lose activity and achieving the purpose of purifying the air.
- It can effectively adsorb tiny particles such as dust, smoke, and pollen in the air, reduce allergens, relieve allergic symptoms, effectively reduce the PM2.5 content in the air, and make the air fresher.
- Negative ions can regulate the human nervous system, promote human relaxation, relieve stress and anxiety, and improve sleep quality.
- Negative ions can activate human cells, enhance cell activity and metabolic capacity, and improve human immunity.

## Product parameter

Mode	KJ200F-A01
Weight	4.5kg
Size	278.8×278.8×581.8mm
Air volume	200m <sup>3</sup> /h
